

## **Ortho-imagery Technical Working Group**

Idaho Geospatial Committee

Meeting Summary

Friday July 16, 2004

1:00 PM

IDWR Conference Room, 1301 N Orchard

Boise, Idaho 83703

Summary Prepared by: Jason Carr

Persons Present:

Jason Carr- IWRRI

Cargie Aitchison - ITD

Sara Strachan - DEQ

Tracy Fuller - USGS

Gene Dana - USGS

Nathan Bentley - Dept of Admin.

Bruce Godfrey - (via teleconference) INSIDE Idaho

The purpose of the meeting was to:

- (1) Ratify Jason Carr's willingness to serve as the Ortho-imagery chairperson,
- (2) Discuss a draft version of an Ortho-imagery state standards document,
- (3) Discuss any changes that need to be made to the Ortho-imagery I-plan document.

### **General Discussion:**

The vote was unanimous for Jason Carr to be the Ortho-imagery chairperson.

It was quickly determined that the document(s) provided by ITD for consideration as a state standard should be considered as a guideline document. It was further determined that each individual document should be considered separately with the caveat that some documents are co-dependent.

From the discussion that followed it was suggested to add digital camera and air-borne scanner specifications to the document.

There was also a discussion regarding, if and where to have proposed imagery acquisitions posted, it was agreed that INSIDE Idaho might be the correct location to do that. The question was then raised on how to get people to use it? We were reminded that Dave Gruenhagen from IDL had previously demonstrated an IMS application that showed photo footprints, what information about the flights that are available and where the photography is archived (Idaho Geospatial Users Meeting 2003 – Dave Gruenhagen – IDL Report [http://www2.state.id.us/itrmc/events/igum/2003/lands\\_gruenhagen.pdf](http://www2.state.id.us/itrmc/events/igum/2003/lands_gruenhagen.pdf)). It

was concluded that this (IDL's application) is a different type of application than the posting of upcoming flight events.

It was suggested by Tracy Fuller to update the I-plan to include high-resolution photography.

**Action Items:**

- 1) Jason Carr and Nathan Bentley to contact IDL, IDFG, Dept. of Parks and Recreation and other agencies to be identified to get their input on the adoption of the guideline documents.
- 2) Jason Carr to find out from ITD what support is needed from TWG, IGC to re-enforce their internal standards.
- 3) Jason Carr and Nathan Bentley to review the Oregon Department of Transportation, Photogrammetric Standards, and 2003 document sited as a reference in the proposed standards document.
- 4) Jason Carr and Nathan Bentley to review the California Department of Transportation, Photogrammetric Standards, and 2003 document sited as a reference in the proposed standards document.
- 5) Ortho-imagery members are to review and red line the guidelines document.
- 6) Ortho-imagery members are to review the I-plan document and consider items for update.
- 7) Jason Carr to organize a follow up meeting. Tentative date of September 7, 2004.
